# About the report

Sustainability Reporting is one strategic communication to your stakeholders. More companies in Indonesia published sustainability reports as part of their non-financial reporting.

**Using NEW Sustainability Reporting Standard(SRS) Framework**, an organization may develop its strategic planning for sustainability, whereas the report will communicate your achievements throughout the journey.

## *Course* **Benefit**

- Well-structured approach in applying SRS Guidelines for reporting organization, from planning up to developing the report
- Obtain GRI certified **training certificate directly from GRI** Netherlands upon completion of the training course
- Using GRI approved standard training material
- Practical example and local case studies for interactive discussion during the training

## *Who should attend*

- Sustainability Managers, enhancing sustainability strategy using SRS framework which will contribute to overall organization objectives
- Sustainability Practitioner (CSR, CD/CR, corsec, investor relation, Corp. Communication, HSE Manager or Officer), provide structural guidance on monitoring, evaluation and reporting
- Applicable to corporate, non-profit organization of any type and size.

## *The Organizer*

PT KarismanPrimalulang is an organizational stakeholder to GRI and **GRI registered training partner** for Indonesia.

Trainers to this training course are senior consultant from PT Karisman Primalulang, in the business of sustainability with hands on experience in report development and project dynamics.
